

The power to save

HIGH EFFICIENCY BENDABLE PV MODULE

High efficiency bendable solar module adopts the highest efficiency cell in the world from USA, with efficiency up to 20% or higher, which enable 25-30% higher power generation than the conventional PV modules at the same size.

By adopting the back contact technique, the cell can be coated with the flexible materials and finally forms the high efficiency flexible solar panel.

This kind of solar panel can be widely used for: Camping, Motor Homes, Caravans, Electro cars, and so on.

SPECIFICATION:

Model	SD-HMB-100-18-3	SD-HMB-120-22-3	SD-HMB-130-24-3
Pm	100W	120W	130W
Voc	21.6V	26.4V	29.4V
Isc	5.97A	5.87A	5.76A
Vmp	17.8V	22.0V	24.4V
Imp	5.62A	5.45A	5.32A
FF	77.6%	77.4%	76.7%
C-FF	19.9%	20.0%	19.5%
NW	1.35Kg	1.80Kg	2.00Kg
Dimension	1060*540*3mm	1315*540*3mm	1445*540*3mm
Price			

(The dimensions are subject to the Junction Box and Cables on panel front side)
